Decade of change

Pryor pleased with achievements in 10 years at P-12

BY DAVID PRESTLEY

In the last week as principal of the P-12 College at the University of Newcastle, John Pryor has been reflecting on the past decade. “It’s been an incredible 10 years,” Pryor said. “We’ve grown from a small primary school to a thriving secondary school with world-class facilities.”

Pryor credits the success of the P-12 College to the hard work of the students, teachers, and staff. “The staff here are incredibly dedicated and passionate about providing the best possible education for our students,” he said. “And the students are amazing too. They’re so bright and curious.”

Looking ahead, Pryor is excited about the future of the P-12 College. “We’re always looking for ways to improve and innovate,” he said. “I’m confident we’ll continue to see growth and success in the years to come.”

The P-12 College has made significant changes over the past decade, including the introduction of new programs and facilities. “We’ve invested heavily in our facilities, including a brand-new science lab, a state-of-the-art gym, and a new library,” Pryor said. “And we’ve also introduced new programs, like our popular STEM program.”

Pryor is particularly proud of the college’s strong focus on community engagement. “We’re always looking for ways to give back to the community,” he said. “Whether it’s through our volunteer programs or our partnership with local businesses.”

Pryor thanks everyone who has supported the P-12 College over the past 10 years. “This place is special,” he said. “I’m so grateful for everyone who has helped make it what it is today.”
